

Changing Smiles. Changing Lives.

LOWCOUNTRY DENTAL ASSOCIATES

To All of our patients,

We are writing to let you know that we are and will continue to be here for all of your dental needs. We are taking the Coronavirus very seriously and we will continue to practice rigorous infection control, as we always have, to prevent any possibility of transmission. If you are feeling sick please call to reschedule your appointment, otherwise we will continue to serve you as planned.

Protocols to Prevent Infection and Reduce Risk in your home and daily life:

The Centers for Disease Control and Prevention (CDC), states that the best defense against most respiratory illnesses, including the flu and Coronavirus (COVED-19), is to practice the following preventative measures daily, which include:

1. Clean and disinfect frequently touched objects and surfaces-Within our practice, this is performed daily and between each patient visit.
2. Clean your hands often - Wash your hands often with soap and water for at least 20 seconds especially after you have been in a public place, or after blowing your nose, coughing, or sneezing. If soap and water are not readily available, use a hand sanitizer that contains at least 70% alcohol. Cover all surfaces of your hands and rub them together until they feel dry.
3. Avoid touching your eyes, nose, and mouth with your hands.
4. Avoid close contact with people who are sick - put distance between yourself and other people, especially for people who are at higher risk of getting very sick.
5. Cover your cough or sneeze with the tissue, them throw the tissue in the trash.
6. **Most importantly, stay home if you are sick.**

Please rest assured that we will do everything in our power to keep you and our staff heathly. We greatly appreciate your help in accomplishing this goal and are certain that together, we will be able to provide both a safe environment and the quality care that you have come to expect from our practice.

Warmest regards,

Lowcountry Dental Associates
